IDENTIFIED COVID-19 CASES IN STAGE 1

Dear school community,

Our school has been advised that a couple of students of our school community have recently tested positive to COVID-19.

Students in Stage 1 and staff who worked with this group of students may have had contact with a person who was infectious with COVID-19.

While testing and isolation is no longer mandatory for exposures in school settings, [NSW Health has provided advice on testing and isolation recommendations](#)[External link](#) for the community following exposure to COVID-19 that should be considered when making decisions for your child and family.

You are reminded that staff and students cannot attend school if they are showing any symptoms of COVID-19. These include fever, cough, sore throat, shortness of breath, runny nose, loss of smell/taste, muscle/joint pains, diarrhoea, nausea/vomiting, extreme tiredness, unexplained chest pain or conjunctivitis (eye infection).

If symptoms occur at any time, you should not attend school and should undertake a rapid antigen test. If a rapid antigen test is positive you/your child should isolate as [someone who has tested positive to COVID-19](#)[External link](#). If you cannot access a rapid antigen test, you can attend a PCR (nose and throat swab) testing clinic.

Advice and further resources are available on the NSW Health website including COVID-19 guidelines and fact sheets for [People who tested positive or were exposed to COVID-19](#)[External link](#). Additional resources are also available on the [NSW Government](#)[External link](#) website.

The safety and wellbeing of our staff and students are paramount at all times. As such, we will continue to ensure that all necessary health advice is closely followed.

A copy of this letter with access to the links is available on the school's website by clicking on the Covid-19 2022 information tab.

Thank you for your support.

Yours sincerely

Mrs Kathy Browne
Principal
