

STAGE 1

TERM 4
WEEK 4

English

This fortnight, students in Stage One have continued to focus on Informative texts. They have taken a closer look at the language used and have had various opportunities to design and follow their own procedures. This is the perfect opportunity for you to chat to them about the procedures that they have at home, i.e. cleaning teeth, making their bed, getting ready for school, etc.

Maths

Back-to-Front Maths has had us looking at look at Balancing and Equivalence and using the equal sign. In Chance we are learning about impossible and possible and if possible, it is likely/unlikely. We will be learning about functions with number patterns and counting patterns. Students will be exploring these concepts through ICT resources and concrete materials.

Coming up!

Week 5: On Wednesday, 11th November, students will have opportunities to participate in a range of 2020 NAIDOC activities. This week students are participating in a NAIDOC colouring-in competition.
